

Warehouse and Distribution

In complex warehouse and distribution environments, every second counts toward the bottom line, data integrity must be maintained at each step, and safety rules the day. To efficiently manage inventory and fulfill orders, technology must be customized to complement your highly orchestrated operations and flexible to adapt to your organization's changing needs.

Expedite Your Processes

On the warehouse floor, rapid and accurate data collection is imperative. Every second spent rekeying a transaction or correcting a pick error adds to the costs of order processing, significantly eroding the bottom line.

Choosing the right technology for your specific application can help shave minutes from every task, while minimizing errors and increasing mobility. The result: A clear and immediate return on your investment. DAP offers a full line of handheld, tablet and vehicle-mount computers that are customizable for use

throughout your operations. Whether you need them to complete discrete tasks or provide cross-functional support, DAP's computers are modular and upgradable to provide cost-effective solutions that address current requirements without locking you into today's technology.

WAREHOUSE AND DISTRIBUTION APPLICATIONS FOR DAP COMPUTERS

- Order picking and staging
- Replenishment
- Put away
- Receiving
- Shipping
- Inventory management
- Sorting
- Transfers
- Stock management
- Distribution visibility
- Time and attendance

MOBILE HANDHELDS

Whether you need the speed and convenience of a trigger pistol grip for replenishment, long-range RFID for inventory management, or voice-ready technology for picking orders, the modular design of DAP's mobile handhelds provides an advanced level of customization to maximize data-collection efficiency and wireless communication.

Available options and features include:

- 1D laser or 1D/2D imager for barcode scanning
- High-frequency (HF) or ultra-high frequency (UHF) RFID reader
- Wireless communication via GPRS/GSM 3G, WLAN with a Summit 802.11 b/g radio, Bluetooth® and GPS
- Optional, removable pistol grip

MOBILE TABLETS

Pairing the operational advantages of a large screen size with the flexibility of a mobile computer, DAP's tablet computers provide cross-functional technology that can be quick-mounted to a forklift or carried and used as a scanner on the warehouse floor.

Available features and options include:

- 1D laser or 1D/2D imager for barcode scanning
- Full touchscreen or tactile QWERTY keypad with dedicated 10-key
- Compact size allows for a clear line-of-sight in vehicle-mounted applications, with quick-release option for handheld use
- Voice ready
- Optically enhanced touchscreens for optimal sunlight viewability
- Wireless communication via GPRS/GSM 3G, WLAN with a Summit 802.11 b/g radio, Bluetooth® and GPS

ENGINEERED BY JLT

VEHICLE-MOUNT

Offering the largest screen sizes among DAP's lineup, vehicle-mount computers are ideal when the computer is to be used exclusively in the forklift cabin or in a wall-mounted application.

Features include:

- Wireless communication via GPS, WLAN, and GPRS/GSM 3G
- Multi-use serial ports to support legacy peripherals like barcode scanners and RFID readers
- Sunlight-viewable touchscreens
- Choice of display size ranging from 12 to 15 inches

BUILT FOR LASTING PERFORMANCE

DAP's ergonomic, rugged computers are built to withstand drops and are sealed against dust and moisture. The full line of handheld and fixed-mount computers is independently certified and tested to function in the most challenging conditions.

ABOUT DAP TECHNOLOGIES

Your IT infrastructure is only as good as the equipment that supports it. That's why it's important to choose reliable computer hardware solutions that can be tailored to your unique specifications and adapt along with your company.

For more than 30 years, DAP Technologies has been committed to understanding the evolving needs of industries that operate in challenging environments. We specialize in time-tested, forward-thinking hardware solutions customized to meet your needs today and flexible to solve the challenges of tomorrow.

DAP designs and manufactures a full range of rugged computers, including PDAs, handhelds, tablets and fixed-mount computers for demanding industries and harsh environments.
